

# Papilio

Ihr Partner für  
sozial-emotional starke Kinder

## Papilio – Your partner for socially and emotionally strong children

### Our vision

All children experience equality of opportunities. They unfold their potential and evolve to become socially and emotionally strong personalities. As a result, an empathetic community becomes a natural consequence.

Every child is the future!

### Our mission

No child is responsible for the environment it is born into. Some children are neglected, deprived or excluded. Others experience strong encouragement of their personality.

We do not want this injustice in opportunities to continue.

Using our programs and in cooperation with our partners, we give all children in nurseries and primary schools, irrespective of origin and social background, the same development opportunities. We support them in dealing with their emotions, strengthening their social competencies and encouraging them to release their potential.

With this stable basis, children are better protected from negative developments such as behavioral disorders, mental health issues and even addiction and violence.

Moreover, the children's health and educational prospects improve.

As socially and emotionally strong personalities, they can live a self-determined life. They enrich our society with empathy, stand up for justice and take on responsibility.

Together we will achieve social added value, for a fairer society with a bright future!
